BIOMEDICAL ENGINEERING BUILDING RUTGERS

Jan 19, 2021

Biomedical Engineering Building Rutgers

Welcome to Biomedical Engineering at Rutgers Biomedical engineers design prostheses, artificial organs and pharmaceutical products that directly improve quality of life for millions of people. They also design and manufacture diagnostic and therapeutic devices and imaging equipment that give doctors and medical researchers the tools to identify and treat a wide range of illnesses and injuries.

Rutgers University, Biomedical Engineering The hiomedical engineering department par

The biomedical engineering department named the building's administrative conference room after the Yellin family, which included Professor Arthur Yellin and his son Lawrence, a 1982 Rutgers electrical engineering graduate. Arthur passed away in 1999; two years earlier, his son Larry died in an automobile accident caused by a drunk driver. The accident also claimed Larry's sister, Nancy, a Rutgers alumna; his wife, Robin; and infant son, Nathan. At this time, Larry was a ...
